If you ever walk up to a box
with the words "but" on it
and see a cat looking at it
push the button on it

active you know that will follow you around you will
know... and the cat will follow you around all you have to do is
push the button on it. And you respond, "I don't understand
what that 'don't' means what to do". If you do this you are a
fucking moron. And the sad thing is there are plenty of you people

who would do exactly this, you know who you are. For God's sake if you're in a room with a cat and you
don't know what you're doing take advice, don't start doing random things. END
